

-volume : double -force : double -area: double

+CalculateDensity: abstract double +CalculatePressure : abstract double

ChemicalCalculator

-moles: double -volume : double

hydrogenIonConcentration: double

+CalculateMolarity : abstract double

+CalculatepH: abstract double

This is the design for my final project. I used this idea of mine to develop a project like this, but with more calculations.

This program is simple, but is helpful when calculating pressure, molarity, density and pH.
